

1. Enterprise Interface (Green Products & Services Providers)

After creating their profile, companies access:

A. GB Starter Link

Objective

Basic visibility and product presence in the green ecosystem.

Main Dashboard

- Basic visibility statistics
- Number of product/service views
- Basic contact requests overview
- Simple profile analytics

Product & Service Management

- Add green products
- Upload technical data sheets (PDF)
- Basic certification display (LEED compliant, etc.)
- Simple product listing management

Marketplace Listing

Appear in:

- Sustainable materials
- Energy solutions
- Water solutions
- Smart building
- Basic green construction categories

Networking (limited)

- Receive contact requests
 - Be discoverable by professionals
-

B. GB Business Link

Objective

Growth, lead generation, and active collaboration.

Enhanced Dashboard

- Detailed analytics (views, engagement, downloads)
- Lead tracking system
- Opportunity insights

Product & Service Management

- Add BIM objects / Revit files
- Add case studies and project references
- Advanced certification display (EPD, FSC, etc.)
- Full catalog management

Marketplace Visibility

Higher ranking in:

- Green materials
- Low-carbon solutions
- Circular economy products
- Smart building technologies

Networking & Collaboration

- Collaboration requests from professionals
- Access to:
 - architects
 - engineers
 - consultants
 - developers
- Participation in regional & international projects

Lead Generation

- Qualified project matching
- RFQ (Request for Quotation) system
- Smart matchmaking with relevant projects

AI Tools

- Product environmental impact analysis
- Carbon footprint comparison
- Market opportunity recommendations
- Certification compatibility suggestions

Opportunities Hub

- Green project tenders
- Construction sustainability projects
- Export opportunities

C. GB Premium Link

Objective

Maximum visibility, global expansion, and strategic leadership positioning.

Premium Visibility

- Top ranking in search results
- Featured homepage placement
- “Premium Green Partner” badge

Advanced Analytics

- Deep performance insights
- Market positioning analysis
- Competitor benchmarking
- Conversion tracking

Full Ecosystem Access

- Priority matching with high-value projects
- International client exposure
- Strategic partnership recommendations

Enterprise AI Suite (Advanced)

- Advanced carbon modeling
- Lifecycle assessment insights (LCA support)
- Predictive market demand analysis
- ESG performance optimization tools

Global Opportunities

- International tenders
- Export acceleration programs (B2B opportunities)
- Strategic global partnerships

Branding & Promotion

- Sponsored campaigns
- Product spotlight features
- Co-branding opportunities with Green BuildLink

2. Green Designers Profile

A. GB link Discovery

Objective

Discovery and networking.

What they find:

Explore sustainable solutions

- Green product library
- Sustainable materials
- Innovative solutions
- Case studies

Networking

- Connection with:
 - companies
 - consultants
 - experts
 - other designers

Project inspiration

- Certified projects
- Technical details
- Green building trends

News feed

- Sustainable construction news
- New products
- Events
- Webinars

Professional profile

- Portfolio
 - CV
 - Skills
 - Areas of interest
-

B. GB link Professional

Objective

Professional development and access to opportunities.

What they find in addition:

Job opportunities

- Green building jobs
- Freelance missions
- Sustainable consulting

Partnerships & collaboration

- Collaboration with companies
- Participation in projects
- Multidisciplinary teams

AI access

- Energy optimization
- Low-carbon material suggestions
- Daylight analysis
- LEED/EDGE optimization
- Sustainable concept generation

Training

- Discounted training programs

- Workshops
- Preparatory certifications

Advanced technical library

- Templates
- LEED guides
- EDGE guides
- BIM sustainable resources

“Green Professional” badge

- Validation of sustainable skills

C. GB link Accredited

Objective

Leadership and international visibility.

What they get in addition:

Premium Visibility

- Priority profile placement
- Official badges:
 - LEED GA
 - LEED AP
 - EDGE Expert
 - WELL AP
- **Featured partner spotlight**

Service Export

- Access to international projects
- Matching with foreign clients

- International missions

Expert Network

- Accredited expert community
- Think tanks
- Technical panels

Exclusive Opportunities

- Premium consulting assignments
- Conferences and speaking opportunities
- Green BuildLink ambassador role

Advanced AI Tools

- Certification pre-assessment
- Carbon footprint calculation
- Energy simulation
- ESG preliminary audit

Additional Revenue Streams

- Service sales
- Coaching
- Mentorship
- Training programs

3. Interface Green Workers

B. Qualified Workers Level

Objective

Recognize trained workers and improve employability.

What they find:

Professional profile

- Skills
- Experience
- Location
- Availability

Training

- Practical video tutorials
- Safety modules
- Introduction to sustainable construction

Job opportunities

- Green construction sites
- Local missions
- Specialized jobs

Skill certification system

- Skill badges
- Evaluations

“Qualified Worker” badge

- Improved visibility
- Recruitment priority

Advanced training access

- High-performance insulation
- Waterproofing techniques
- Solar installation basics
- Construction waste management

Career development

- Skill progression tracking
- Training history record

C. Verified Workers Level

Objective

Build trust and quality assurance.

What they find in addition:

“Verified Worker” badge

- Validation after field inspection
- Verified project history

Priority access to premium projects

- Certified construction sites
- International projects

Reputation system

- Client ratings
- Site feedback
- Quality score

Smart recommendations

- AI matching with suitable projects

Improved income opportunities

- Access to higher-paid missions
